

Expense Tracker – Mini Budget App (Student Assignment) Project Overview Create a simple Expense Tracker that helps users record, manage, and analyze their daily expenses using JavaScript fundamentals. Data Structure Each expense must follow this object format:

{id, title, amount, category, date} Core Features (Required for All Tracks) - Add a new expense (with validation: title and amount required)

- Delete an expense
 - Filter expenses by category
 - Calculate and display total expenses
 - Show highest expenses (optional)
 - Use array methods: map, filter, find, forEach
 - Use destructuring + spread operator
- Track Requirements **Frontend (JavaScript + DOM)**
- Use an HTML form to add expenses
 - Display expenses in a list or table
 - Implement category filtering
 - Dynamically update the total amount
 - Use clear and modular JavaScript functions

Backend (Node.js)

- Build API endpoints:
 - GET /expenses
 - POST /expenses
 - DELETE /expenses/:id
 - GET /expenses?category=X
- Store data in memory (array only)
- Respond with JSON

React Native

- Screen with TextInputs and a button to add an expense
- Display expenses in a FlatList
- Filtering section (picker or buttons)
- Display total expenses at bottom

Example UI (Simple) Frontend Example:

- Form (Title – Amount – Category – Date)
- List showing: Title | Amount | Category | Delete Button
- Total Expense at the bottom

Node.js Example:

- GET /expenses → returns list
- POST /expenses → adds new expense
- DELETE /expenses/3 → removes expense with ID 3

React Native Example:

- Input: Title, Amount
 - Picker: Category
 - Button: Add
 - FlatList Rendering each item
- Notes - Code must be clean and organized.
- Functions should be reusable and well-named.
 - Use comments where necessary.
 - Avoid duplicated logic.

Submission Instructions (GitHub Required) Repository name:

expense-tracker-[student-name]

Your repository must include:

- Full project code
- README.md containing:
 - Project description
 - Features list
 - How to run the project
 - Screenshots (optional but recommended)

Deadline Submit your GitHub link at the end of **Week 2**.
